Portion of review from "American Architect," page 16, issue of July 8, 1908.

"Probably the most interesting moments of the trip abroad by the architectural students are those spent in sketching bits of interest in water color. And it is equally true, we believe, that nothing is so helpful, so reminiscent as these same notes of color when viewed in after years.

We have been prompted to these remarks by the receipt of five portfolios of color plates, being copies of original water color drawings by English and French water colorists."
